

# Global ITAD Capabilities

Dynamic's global ITAD network provides consistent, compliant, and efficient asset disposition across over 100 countries.

## BENEFITS

Dynamic's international partners are selected for compliance and performance, with fully vetted and certified facilities. Clients benefit from centralized coordination, local execution, and unified reporting, regardless of where their assets are located.

## PROBLEMS SOLVED

Multinational companies often struggle with fragmented ITAD processes while partnering with multiple vendors. This capability addresses those challenges by standardizing procedures and documentation across all global locations through a single vendor.

## SUSTAINABILITY IMPACT

We apply the same environmental standards worldwide, ensuring responsible reuse, resale, and recycling in every country. Our ESG reporting aggregates global efforts into a single platform for tracking Scope 3 emissions.

**"The reporting is accurate, the entire process is automated, and they are an easy organization to work with."**

- Global Fortune 1000  
Business Services Organization
