

Building A Strong Partnership Through Communication

Through a structured and collaborative approach, Dynamic Lifecycle Innovations established a strong partnership with FedEx. They laid the foundation for a scalable, trust-based collaboration that continues to evolve with the client's growing needs.

PROBLEM

Critical ITAD Breakdown

FedEx faced a pressing logistical and operational challenge: the sudden termination of their previous ITAD vendor had created a 1,200-pallet equipment backlog, stalling workflows and threatening SLA compliance across facilities.

CHALLENGES

Critical ITAD Breakdown

With rising pressure to ensure secure data handling and environmental accountability, FedEx initiated a rigorous RFP process in search of a new long-term partner that could resolve the backlog—and support evolving needs at scale.

THE SOLUTION

Planning and logistics

Dynamic Lifecycle Innovations responded with a detailed, forward-thinking proposal built around six key pillars of partnership success. This approach not only won the RFP but laid the groundwork for a highly collaborative, continuously evolving relationsh

“From the vendor transition to day-to-day management, the Dynamic team has been a timely, responsive, and outstanding partner”

James Bailey, IT Asset Manager at FedEx

CONCLUSION

Cultivated a Successful ITAD Partnership

By leveraging strong communication and focusing on customization, we were able to build a lasting partnership that was successful for FedEx.

Pillars for Success

**Transparency**

A structured and transparent RFP and onboarding process builds trust.

**Collaboration**

Collaborative problem-solving drives measured results and efficiency.

**Adaptability**

Maintaining open communication fuels efficient problem solving.

**Consistency**

Establishing a meeting cadence solves problems early.

**Continuous Improvement**

Mutual business understanding leads to sustained success.

**Scalability**

Scalable solutions future-proof the partnership for growth and organizational changes.

About Dynamic

Dynamic Lifecycle Innovations is a global leader in electronics and materials lifecycle management, delivering secure, sustainable, and value-driven solutions. We specialize in IT asset disposition and data center decommissioning. Our customized service packages safeguard sensitive data, simplify complex logistics, and maximize value recovery, all while helping organizations achieve their sustainability and ESG goals.
