DYNAMIC LIFECYCLE INNOVATIONS EXPANDS GLOBAL PARTNER NETWORK TO OFFER COMPREHENSIVE, WORLDWIDE ITAD SOLUTIONS

Enhanced “In Country” Services Provide Customers with Increased Global Risk Management, Data Security, Flexibility, and Cost Savings

ONALASKA, WIS. (April 1, 2019) – **Dynamic Lifecycle Innovations**, a full-service electronics and materials lifecycle management corporation, today announced that it has significantly expanded its global partner network to offer customized IT asset disposition (ITAD) solutions to customers worldwide. Clients can now reduce the complexity of managing their global ITAD programs with multiple providers across different geographic regions. Instead, they can utilize a single-source vendor with extensive in-country resources to ensure a secure chain of custody, while reducing transportation and overall service costs. Dynamic’s global partners also deliver the confidence and peace-of-mind that all local environmental legislation and compliance standards are adhered to on a country-by-country basis.

“Global ITAD services encompass a variety of complex issues that are often both related, yet at odds with each other at the same time,” says Miranda Monahan, director of global technology partners, Dynamic Lifecycle Innovations. “At Dynamic, we leverage our industry expertise and vast partner network to eliminate complexity and conflict. We help customers achieve their global ITAD objectives with custom solutions in their best financial interests, while going above and beyond regulatory compliance, and providing the same exceptional risk management and customer service that our U.S.-based customers receive.”

Dynamic Lifecycle Innovations’ worldwide coverage now includes seven approved partners and 68 approved foreign facilities. These, combined with Dynamic’s 14 approved domestic facilities, allow clients to benefit from flexible, single-source global risk management programs covering over 100 countries. A detailed world map view of Dynamic’s approved global partner and facilities coverage is available at www.thinkdynamic.com/global.

“In today’s fast-paced world of technology, anything vendors can do to simplify a solution for their clients makes them that much more attractive and competitive,” adds Randy Hall, global alliance principal at HP. “Dynamic has created a global solution for an ever-changing world. Kudos to them for having the foresight and capabilities to accomplish what only a handful of companies in the ITAD space have done.”

About Dynamic Lifecycle Innovations

Dynamic Lifecycle Innovations is a full-service electronics and materials lifecycle management corporation providing solutions for IT asset disposition, data security, mobility management, electronics recycling, legislative compliance, product refurbishment, remarketing and resale, and metals recovery, with locations in Onalaska, Wis. and Nashville, Tenn. The company creates customized service packages designed to safeguard its customers' sensitive data and protect the environment from e-waste and other pollutants. Since its inception in 2007, Dynamic has become an industry leader by constantly refining its services and processes with new insights in materials lifecycle management.

Dynamic Lifecycle Innovations strives to foster authentic, meaningful relationships with clients, maximize their value recovery, ensure their assets and data are properly disposed of, and deliver the security they need to know the job is done right. Dynamic's goal is to create an exceptional experience with every customer interaction and deliver top-quality services with passion, integrity, transparency, and environmental responsibility.
