FOR IMMEDIATE RELEASE

DYNAMIC LIFECYCLE INNOVATIONS JOINS SOLAR ENERGY INDUSTRIES ASSOCIATION (SEIA) WITH SUSTAINABLE SOLUTIONS FOR SOLAR PANEL RECYCLING

ONALASKA, WIS. (August 16, 2018) – Dynamic Lifecycle Innovations, a full-service electronics and materials lifecycle management corporation providing solutions for solar panel recycling and reuse, electronics recycling, IT asset disposition (ITAD), legislative compliance, product refurbishment, remarketing and resale, metals recovery, and data security, today announced its partnership with the Solar Energy Industries Association (SEIA).

“While solar installations boom across the US, we must plan ahead to safely recycle panels at the end of their lifecycle,” said Abigail Ross Hopper, president and CEO of the Solar Energy Industries Association. “Panel recycling will be a critical part of us embodying the sustainable spirit of our industry, and we are thrilled to partner with Dynamic Lifecycle Innovations and, in time, a number of other companies, to build on this important work.”

“With solar power now becoming the fastest-growing energy source, and millions of solar panels in operation, the demand for an end-of-life solution has significantly increased,” added Jason Schott, vice president of sales, Dynamic Lifecycle Innovations. “We’re proud to partner with our customers to ensure that solar power remains sustainable for our environment, even after the panels’ life cycle ends.”

Dynamic Lifecycle Innovations offers customers pick-up services for panels in need of disposal due to damages from weather, shipping, or installation. This includes solar PV panels of all types, inverters, and broken and/or salvaged units. As with any material Dynamic accepts, the company guarantees that solar panels will be properly recycled to their fullest extent and never disposed of in a landfill, in full compliance with all local, state, and federal rules and regulations.

For more information on customized electronics and materials lifecycle management strategies from Dynamic Lifecycle Innovations, including solar panel recycling and reuse, visit the company’s Web site at ***www.thinkdynamic.com***.

About Dynamic Lifecycle Innovations

Dynamic Lifecycle Innovations is a full-service electronics and materials lifecycle management corporation providing solutions for IT asset disposition, electronics recycling, legislative compliance, product refurbishment, remarketing and resale, metals recovery, and data security with locations in Onalaska, Wis.; Nashville, Tenn.; and Minneapolis, Minn. The company creates customized service packages designed to safeguard its customers' sensitive data and protect the environment from e-waste and other pollutants. Since its inception in 2007, Dynamic has become an industry leader by constantly refining its services and processes with new insights in materials lifecycle management.

Dynamic Lifecycle Innovations strives to foster authentic, meaningful relationships with clients, maximize their value recovery, ensure their assets and data are properly disposed of, and deliver the security they need to know the job is done right. Dynamic's goal is to create an exceptional experience with every customer interaction and deliver top-quality services with passion, integrity, transparency, and environmental responsibility.
